

MBA IN PUBLIC ADMINISTRATION

The MBA in Public Administration is designed for anyone working in local, regional, or central government, or for a charity or a public-private partnership, who wishes to develop his or her academic and vocational skills.

It addresses some of the key issues facing the public sector, such as effective leadership; anticipating and responding to change; performance management; governance and ethical practice; and sustainability. This MBA will give you the opportunity to develop specialist expertise but also the ability to respond to an ever-changing and challenging environment: that of the business world.

Although the students and faculty in the MBA in Public Administration programme focus on local and national projects, they do so in a global context, drawing on the international strengths of The Cyprus Institute of Marketing (BVI) - Global Business University-Europe. The curriculum draws on vast international resources to address a wide variety of local and national level policy issues in a rapidly globalising context.
